FNN INTERVIEW – LAKE RESOURCES INKS LANDMARK DEAL IN ARGENTINA – INTERVIEW WITH MANAGING DIRECTOR

Argentina focused lithium exploration company Lake Resources N.L. (ASX:LKE, “Lake” or “LKE”) is pleased to provide shareholders with a video interview with Finance News Network (FNN) regarding the company’s landmark deal in Argentina in Jujuy province as discussed by Lake’s Managing Director, Steve Promnitz.

To view the full interview, please copy the link below into the internet browser:

The interview is also available on the Presentations and Videos section of the Investors section on the Lake Resources website:

Other videos taken on-site at Olaroz and Cauchari are available in the same Presentations and Videos section of the website.

An audio file of the LKE Investor Call held on 2 March 2018 is also available in the same section and follows the presentation slides released on the same day together with Q&A.

Background on Lake Resources NL (ASX:LKE)
Lake Resources NL (ASX:LKE, Lake) is undertaking an aggressive exploration programme to explore and develop prime lithium projects in Argentina, owned 100%, among some of the largest players in the lithium sector. Lake holds one of the largest lithium tenement packages in Argentina (~170,000Ha) secured prior to a significant ‘rush’ by major companies with three key lithium brine projects located in the Lithium Triangle which produces half of the world’s lithium. Lake also holds one large package of lithium pegmatite properties which were an unappreciated source of lithium in Argentina until recently.

The three key brine projects, Olaroz/Cauchari, Paso and Kachi, have similar settings to major world class brine projects being developed in the highly prospective Jujuy and Catamarca Provinces. One project is located next to Orocobre’s Olaroz lithium production and SQM/Lithium Americas Cauchari project covering ~45,000 Ha. The Kachi project covers 50,000 Ha over a salt lake south of FMC’s lithium operation and near Albemarle’s Antofalla project.

Drilling at Kachi has shown conductive brines in thick porous sands with results are anticipated over the coming months. Surface sampling has revealed positive lithium results which will be expanded through the drilling program and geophysics. Exploration over Kachi and the advancement of the lithium projects in Jujuy will provide several catalysts for the company’s growth as these areas are assessed for major discoveries.
Significant corporate transactions continue in adjacent leases with development of SQM/Lithium Americas Olaroz/Cauchari project with an equity/debt investment over $300 million and Advantage Lithium’s equity transaction in some of Orocobre’s leases. LSC Lithium has also raised over $60 million on a large lease package in similar areas as Lake’s properties. Nearby projects of Lithium X are subject to a takeover offer of C$265 million in December 2017.
